

Beef, Veal and Lamb Report

Beef, Veal & Lamb- Beef production last week rose .4% and was 5.5% larger than the same week last year. Near term cattle supplies have tightened but overall cattle supplies should improve in the coming months as reflected by the sharp discounts in the April and June cattle futures markets. The February 1st cattle on feed inventory was .7% larger than last year while cattle placements into feedlots during January were up 11.4% from 2016. The average placement weight, however, was down 1.6% from a year ago. U.S. beef imports have been challenged by smaller beef production out of the major exporter Australia. This could be supportive of the lean beef trim markets in the coming months.
