

Lettuce prices have fallen sharply during the last month as supplies have improved. Iceberg lettuce shipments rose 20.5% last week. There are noteworthy concerns, however, that the heavy rains in California could cause lettuce supply gaps during the spring. Thus, the lettuce markets could be erratic during the next several months. The five-year average move for the iceberg lettuce market during the next four weeks is an increase of 47%. Retail produce prices during January were the least expensive since the fall of 2012.
