

**Iceberg Lettuce (24 count)**

Lettuce prices have fallen sharply in recent weeks as the harvest and supplies improve. Iceberg shipments last week were essentially flat with the prior week and were 2% more than the same week last year. Temperatures in the chief U.S. harvest region are forecasted to cool during the next week which could slow the harvest. Thus, the downside price risk in the iceberg lettuce market from here is only expected to be modest in the near term. Cold weather is lingering in the Florida tomato fields, but history suggests that lower prices should be pending.
