

Iceberg Lettuce (24 count)

Avocado supplies remain relatively subpar due in part to weak imports from Mexico and an uninspiring California harvest. Last week avocado shipments from California were 44% less than the same week last year. Still, history suggests that the greater price risk in avocados from here is to the downside during the next few months. The five-year average move for the 48 ct. Hass avocado market from this week through the end of September is a decline of 19%. The California tomato harvest has improved in recent weeks but remains below 2016 levels. History suggests tomato prices could firm in the coming weeks.
